

SCILICE FINE ET GROSSE

TEXSA SILICE is a sand with granulometry of 0.5 - 1.2 mm) to be installed on the last layer of polyurethanebased TEXSA Waterproofing Systems.

ADVANTAGES

Reduces the risk of slipping.

INSTALLATION

TEXSA SILICE is sprinkled on the last layer of the waterproofing membrane. Excess of material should be removed once dried and apply the final layer.

Liquid Waterproofing & Mortars Auxiliary
