

GÁRGOLA PARA BALCONES

Elements that allow horizontal drainage on roofs, terraces and balconies.

ADVANTAGES

- Resistant to wear caused by the sun, the ozone and other non-chemical atmospheric agents that are normally present.
- High flexibility, even at low temperatures
- Rectangular form for rationed water removal
- Manufactured with elastic material, which guarantees watertightness over time
- suitable tube length and lower notches that allow the water to be drained without staining the walls.
- Ductile
- Totally finished and complete
- Waterproof
- Easy to install
- Absorbs the movements of the roof
- Due to its nature it is completely welded to the membrane
- Flame resistant during the application of the membranes

APPLICATION

- Balconies
- Horizontal drainpipes

Auxiliary Bituminous Waterproofing
